

brava!® enterprise

Brava!® Enterprise offers viewing, annotation, redaction and secure content sharing in a single, intuitive interface. It supports virtually any file, including Adobe® PDF, TIFF, and all popular office, image and CAD formats. Because it is server software, there is no need to install or maintain software on every desktop.

View

Brava can view almost any Windows-based format* with excellent fidelity. From office and image formats to CAD drawings, Brava has it covered.

Annotate

Easily collaborate with colleagues, vendors, customers, suppliers and more. Brava's markup and annotation tools are simple to use and are saved in an overlaid XML-based format so the source file is never altered.

Redact

Use Brava's Redaction tool to remove sensitive content and privacy information. Redact by word/phrase, phrase list or zone. Add exemption codes citing the reason for redaction. Brava creates a new rendition in PDF, TIFF or secure CSF format for distribution and never alters the source file.

Secure

Visual Rights®

Output files to PDF, TIFF or to our own Content Secure Format (CSF) with Visual Rights® persistent file security. Publishing to CSF lets you control what others can do with file. Visual Rights security options include:

- Password protection
- Hard or relative file expiration date
- Watermark or print banners
- Usage restrictions: print, copy, markup/annotate, layer views, measure

Because CSF is a proprietary format, it is completely secure. It is an encrypted (256-bit) format that can only be created or viewed using products from Informative Graphics®.

Features & Benefits

Key Features		Benefits
View	Opens Many Formats	Save training and software costs by eliminating the need to have native, potentially complicated software on every desktop.
	Unified Viewer	Same easy interface for all file types with no training required.
	Page Thumbnails	Jump right to the page you need without navigating the entire document/drawing set.
	Search With Term-Hit Highlighting	All instances of a search string are highlighted for quick identification.
Markup / Annotate	Original Files Untouched	Original files are never modified; annotations are saved as a separate, overlaid XML file.
	Concurrent Annotations	Each reviewer can create a separately managed annotation file, supporting permission roles and allowing multiple users to comment on the same file at the same time.
	Annotations Saved As XML	Annotations are saved in a non-proprietary, open XML format.
	Burn-In	Annotations can be burned into a PDF or secure CSF copy of the original file.
	Stamps	Add stock stamps like Approval, Rejected or Cancelled or create custom stamps.
	Consolidate	Select annotation/markup files from multiple reviewers to combine into a single file.
Print	Print Region	Select an area and print just that area blown up to fit the output page size or to scale.
	Watermarks & Print Banners	Add a watermark or print banners to one or all print outs. Use pre-set wildcards or insert metadata from your ECM system.
	Print Preview Thumbnail	The print dialog shows a thumbnail view of exactly how the document will print, including scaling, rotation and margins.
Measure	Copy to Clipboard	Copy measurement results to the Windows' clipboard.
	Auto-Magnify On Point Selection	When measuring, Brava offers a magnified view of the sensed point of interest.
	Snap To Geometry	Accurately snap measurement points to end, mid and center coordinates in vector (CAD) files.
Compare	Compare Versions/Verify Changes	Visually compare two files/pages/sheets with differences highlighted (red for deletions, green for additions). View with annotations for easy change verifications, ensuring no change was left unincorporated. A compare slider dynamically fades from one file to the next.
	Alignment	Align or scale files to match.
Redact	Redact By Zones/Text Strings	Define areas in the document to be redacted when published to PDF or secure CSF.
	Add Exemption Codes/ Redaction Reasons	Add a note to a redaction area indicating the reason and/or code such as Freedom Act or Privacy Act exemption coding.
Publish	Save To PDF, TIFF, DWF Or Secure CSF	Save the file you are viewing as a rich content PDF, TIFF, DWF or secure CSF. Add annotations, redaction (block out) areas, a watermark and print banners. Add security, like feature restrictions with CSF for more secure distribution and view with the free Brava Reader (opens PDF, TIFF and CSF).
Customization	Toolbars/Menus/Dialogs Customization	Remove toolbars and menu options for a simpler interface or customize dialog boxes.
	Startup Customization	Configure the initial view state, including the background color, date format, markup color and more.
	Events Customization	Add custom processing on file open, file exit, markup save, markup open or other events.
	Publishing Customization	Set default rights to apply to CSF files or specify where to save PDF or CSF output files.
